

EASTMAN CHEMICAL COMPANY

HYDROCARBON ANALYTICAL CHEMIST

Eastman Chemical Company, a Fortune 500 Company, is seeking a **Hydrocarbon Analytical Chemist** at its site located in **West Elizabeth, PA**. This position will be responsible for completing technical/analytical assignments to support site Hydrocarbon Resins operation including use of quality assurance/analytical instrumentation and tools to maintain and improve manufactured product quality, product development, and feedstock qualifications. Laboratory work includes analytical instrumental analysis, method development and product improvement projects, as well as direct customer contact to support analytical and product performance inquiries.

QUALIFICATIONS:

- B.S./M.S. Degree in Chemistry or Chemical Engineering with 0 - 10 years of experience.
- An analytical chemistry background is strongly preferred. Familiarity with SAP preferred but not required.
- Expected to exhibit functional and technical knowledge and skills to perform the job at a high level of accomplishment, solve difficult problems, work well with others and be dedicated to meeting expectations of internal and external customers.
- Must be flexible, able to adapt effectively to changing priorities, and be available for rotating off shift on-call analytical coverage to meet site needs. Experience with waste water and other environmental analyses is a plus.
- Supervisory responsibilities potentially include several Senior Level Technicians based on project and program needs.

Eastman Chemical Company offers a competitive salary and benefits package.
